APLICAÇÃO HIDROREPELENTE

HIDROREPELÊNCIA

Proteção que repele a água e mantém o tecido seco.

Sobre a Hidrorepelência

A hidrorepelência oferece proteção contra respingos, garoa e névoa, mas não é indicada para exposição contínua à água ou molhamento intenso.

Além da proteção, o tratamento preserva a respirabilidade do tecido, permitindo a troca de calor e vapor entre o corpo e o ambiente, proporcionando maior conforto durante o uso.
